

SUMP Participation Kit

The Participation Kit is dedicated to providing practical advice underpinned by city examples on engaging citizens and stakeholders in the [Sustainable Urban Mobility Plan \(SUMP\)](#) development process.

It provides information on how to integrate participation into the transport planning process and prepare, manage and evaluate involvement activities.

The Participation Kit consists of the following components:

- Quick facts brochure: a concise summary of reasons for participation and approaches to involve citizens and stakeholders in sustainable urban mobility planning;
- Participation Manual: a comprehensive handbook providing detailed explanation of the participation challenges and practical recommendations for how these can be overcome;
- Online learning course: an interactive e-learning course inviting interested mobility practitioners to learn more about participation at their own pace and from anywhere in the world. The e-learning course can be taken at the [Mobility Academy](#).

The Participation Kit has been developed in the [CH4ALLENGE project](#), which is co-funded by the European Commission's Intelligent Energy Europe Programme and has the overall aim to facilitate the take-up of SUMPs throughout Europe.

To download the materials, see below. For more information on the CH4ALLENGE project, visit sump-challenges.eu.
