

**5th European Conference on
Sustainable Urban Mobility Plans**
14-15 MAY 2018 | NICOSIA, CYPRUS

HOW TO WORK OUT IF A PROPOSED SUMP IS A GOOD ONE?
Workshop on methods to assess the quality of SUMPs

Plans for quality assessments of SUMPs in Slovenia

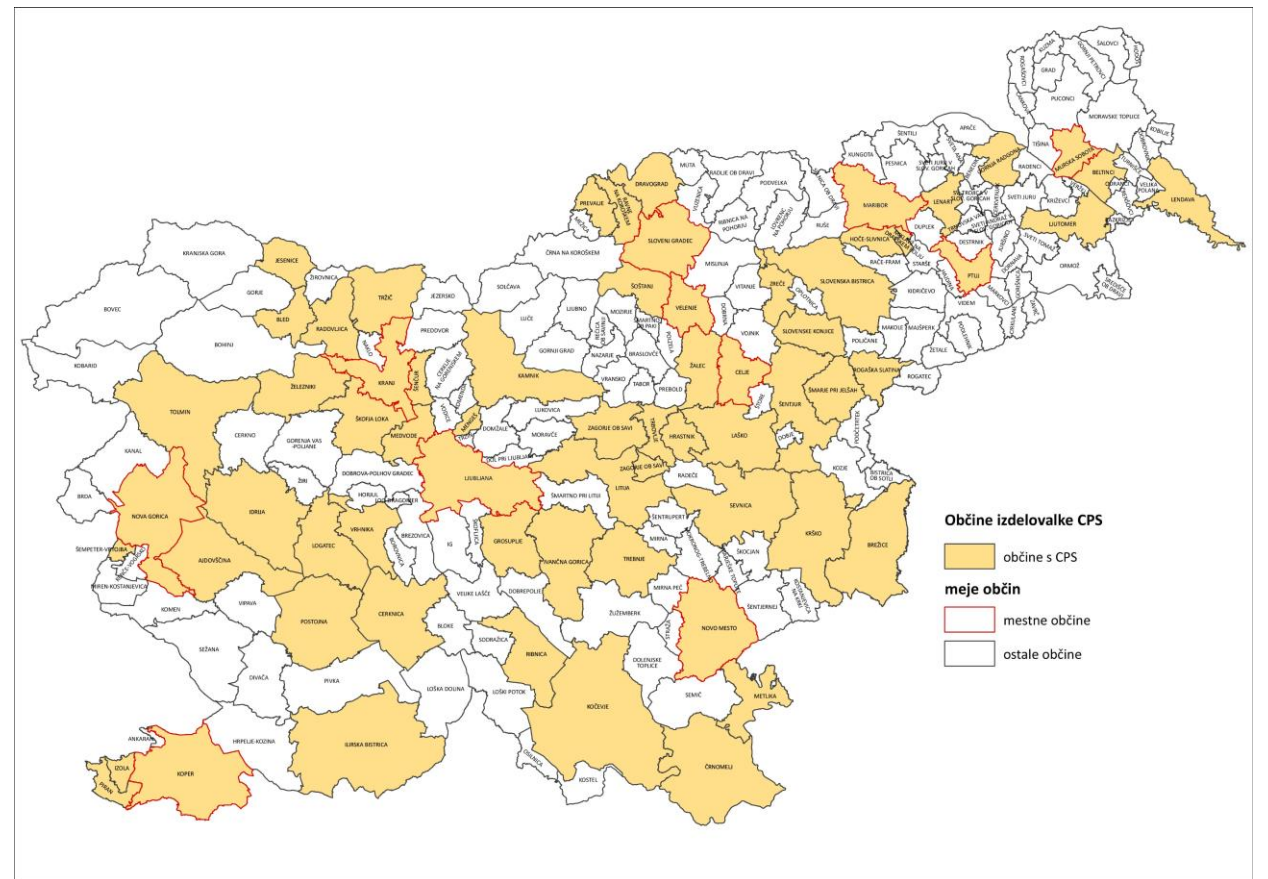

Polona Demšar Mitrovič (MZI)

Ministry of Infrastructure of the Republic of Slovenia

1. Current state

- 70+ municipalities (of 212) with SUMPs
- Financing contract secured good process evaluation
- Content not evaluated

2. Challenges

- Some SUMP's diverted from the original idea (e.g. focus on new road capacities)
- No existing content evaluation tool or standard, though need for it
- SI promised to develop an assessment tool in PROSPERITY

3. Analysis of current practice in EU

- Part of PROSPERITY analysis and WS in Leeds
- Decision – assessment is not to confirm/reject but to improve quality and raise awareness on key topics

4. Approach

- Expert group on national and later on regional level
- Thematic guidelines to support the basic SUMP guidelines
 - Already developed: walking, cycling infrastructure, P+R
 - In development: mobility plans, integration of spatial and transport planning
 - Planned: parking management, school mobility, alternative PT, etc.
- Each guideline supported by a training

5. Next steps

- Elaboration and testing of the assessment approach by autumn 2018 (NTF)
- Continuous elaboration of thematic guidelines
- Established expert group at the Ministry of Infrastructure & external experts to prepare first evaluations
- Establishment of regional network of coordinators to take over this task
