URBACT III

URBACT III supports interregional co-operation. It co-finances the creation of networks of cities to develop integrated solutions to common urban challenges, by learning from one another. The first call for the creation of up to 20 Action Planning Networks was open in 2015; other calls will open in the following years.

Interested cities should follow up the calls.

For more information, visit the [URBACT website](#) and its section on [open calls for networks](#).
