## **Eurostat online transport databank**

**Topic:**

Collective passenger transport  
Urban freight/city logistics

**Sources:**

European Sources

The Eurostat online section for transport contains general data on passenger and freight transport for air, rail, road and water transport. Most of the data are also available in the [EU Transport in Figures: Statistical Pocketbook](#) of the European Commission.

A big advantage of the Eurostat databank is the possibility to get regional statistical data for federal states and metropolitan areas of the EU member states.
