[Connecting Europe Facility: €1.4 billion to support sustainable transport projects](#)

Body:

The European Commission has launched a call worth €1.4 billion to support key transport projects through the [Connecting Europe Facility \(CEF\)](#), the EU's central funding instrument for infrastructure networks. The investment will help build missing connections across the continent while focusing on safer, smarter and more sustainable transport modes.

Transport Commissioner Violeta **Bulc** stated:

"To accelerate decarbonisation and contribute to the completion of the [Trans-European Transport Network \(TEN-T\)](#), we are making full use of the resources available through the Connecting Europe Facility. These investments will support smart and sustainable mobility and better connect our citizens across Europe."

The deadline for applications is 26 February 2020. A [virtual information day](#) will take place on 7

November 2019. The Connecting Europe Facility (CEF) is the EU funding instrument for strategic investment in transport, energy and digital infrastructure. Created in 2014, the Connecting Europe Facility has so far supported 763 projects with close to €22 billion in EU funding.

More information is available [here](#).

Press release issued in October 2019.
