

## **European Platform on Sustainable Urban Mobility Plans - Platform Secretariat**

The Platform supports the transition towards competitive and resource-efficient mobility systems in Europe's cities by:

- Supporting the further development of the Sustainable Urban Mobility Plan (SUMP) concept and the tools required for its successful application by local planning authorities;
- Providing this Mobility Plans portal to disseminate relevant information, publications and tools;
- Facilitating the co-ordination and co-operation across the different EU-supported actions through a Co-ordinating Group;
- Offering opportunities for the exchange of knowledge, experiences and contacts through an annual SUMP conference, events, training courses and social media.

The work of the Platform is supported by a Secretariat which serves also as a central contact point for all inquiries from inside and outside the Platform.
