Past event

### **Information / Description:**

The 2016 World Congress is an opportunity for government and industry policy makers, practitioners, researchers and ITS providers to share information on social needs, opinions and technical developments addressing modern transport issues. It will be a chance to network, do business and re-connect with former acquaintances.

In collaboration with ITS Asia Pacific, ERTICO and ITS America, ITS Australia has prepared an engaging program. In the tradition of ITS World Congresses there will be plenary, scientific, technical, commercial and interactive sessions, and a dynamic exhibition.

Technical tours program will showcase Melbourne as a leader in this field which will be supported by a demonstrations program featuring leading Australian and overseas applications of the latest ITS technologies.
