Past event

### **Information / Description:**

Autonomous vehicles are rapidly becoming the vision for the future for many motor companies, which the Autonomous Vehicle Summit aims to recognise.

The international 2-day conference will provide a detailed insight into automation and sustainable urban mobility, analysing the impacts which autonomous vehicles could bring to society.

Examples of the highly accredited speakers are as follows:

- Project managers
- European Commission Heads of Units
- Chair holders
- Members from faculty of transportation engineering
- General managers of government sectors
- Innovation officers

The speaking slots are focused on autonomous vehicles, their effects and opportunities. The significance of infrastructure will also be discussed, with many of the panel talks covering innovations in infrastructure.
