### **Information / Description:**

The urban commercial transport (goods, service and business traffic) accounts for up to 40 % of the traffic in urban areas. For everyone concerned with urban policy, planning and transport operations it is therefore essential to gain a better understanding of these activities.

The conference will focus on:

- Introduction on the issues of commercial transport in urban areas;
- Data necessity and goods transport indicators for decision making processes;
- Strategies and measures for the organisation of a sustainable urban commercial/goods transport;
- Comparison of regulations in EU concerning commercial/goods transport planning measures;
- Integration of commercial/goods transport in urban planning processes.

Conference languages: Simultaneous translation in English, German, and French
