CIVITAS ECCENTRIC online seminar: clean and efficient urban freight

Tuesday 01 September 2020, 15:30 to 17:00

Information / Description:

We live in the world where goods and services have become more available than ever. Yet across Europe and the world, achieving low- and zero-emission urban goods delivery has remained difficult. However, new clean freight vehicles and fuel technologies, innovative business models and efficient supply chains could be the drivers for achieving more sustainable goods distribution at the local level.

This webinar will introduce work conducted as part of CIVITAS ECCENTRIC for fostering clean and efficient urban logistics, with Stockholm (Sweden) and Madrid (Spain) set to present their innovative solutions.

Stockholm will discuss its night-time deliveries using silent vehicles and Madrid will reveal its fully electric municipal delivery truck and the scheme that sits behind it.

A draft agenda can be seen below:

- **15:30 - 15:45** - Introduction to ECCENTRIC by ICLEI Europe
- **15:45 - 15:55** - Juan Azcarate Luxán, Deputy Director General for Energy and Climate Change, City of Madrid - Introduction and overview of ECCENTRIC’s work on clean and efficient urban freight
- **15:55 - 16:05** - Rafael Ruiz, Associate Director, Transport Advisory Services at Arup, Madrid - Introduction on importance of freight and its relation to the corona crisis
- **16:05 - 16:25** - Luis Tejero Encinas, City of Madrid - Efficient and clean logistics scheme for freight distribution in Madrid
- **16:25 - 16:30** - Question slot for Luis Tejero Encinas
- **16:30 - 16:50** - Robin Billsjö, City of Stockholm - Night-time deliveries using clean and silent vehicles, measure description, update and lessons learned
- **16:50 - 16:55** - Question slot for Robin Billsjö
- **16:55 - 17:00** - Final discussion
