[CIVITAS SUMP-*Up* webinar: Integration of SUMP-*s* into urban planning and climate work](#)

Monday 11 November 2019, 10:00 to 11:30

Past event

Information / Description:

Urban planning, climate and energy work and sustainable urban mobility planning all share the same goal: to plan and develop cities and municipalities in a sustainable, climate-friendly way.

Therefore, the integration of different strategies and approaches is of utmost importance. It prevents duplicated work in city administrations and facilitates the efficient and successful implementation of strategies.

The sixth CIVITAS SUMP-*Up* webinar for mobility practitioners will focus on how to integrate Sustainable Urban Mobility Plans (SUMP-*s*) into urban planning, climate and energy strategies.

The SIMPLA project will present; the project aimed to harmonise Sustainable Energy Action Plans and SUMP-*s* through capacity building activities for small- and medium-sized municipalities,

The project produced comprehensive guidelines on how cities can coordinate and integrate their work on climate and energy with sustainable mobility planning and harmonise the concept of Sustainable Energy and Climate Plans (SECAP-*s*) with SUMP-*s*.

In addition, the the City of Lahti (Finland) will present its extensive integrated urban development plan “Lahti Direction”.

Register for the webinar below.
