Commuting with COVID-19: Keeping you safe with data

Wednesday 27 May 2020 at 17:00
Past event

Information / Description:

With cities around the world exiting COVID-19 lockdowns, there is now a new, crucial curve to flatten: public transit commuting during peak hours. But how? Before the pandemic, many public transportation systems were already running at full capacity during peak hours, with some even reporting extreme levels of overcrowding. In a world of social distancing, increased hygiene measures and heightened anxiety, what can public transport operators possibly do to guarantee safe and efficient public transport during this new normal?

Join a panel of experts to explore the latest in innovative, data-driven technical and political solutions being developed to protect passengers under ground, above ground and across the globe.

The webinar will take place on 27 May 2020 at 17:00 CEST. The webinar will be recorded for those who are unable to attend at this time.
