Electric Vehicles: Everything is Changing

Wednesday 10 April 2019 at 09:00 Thursday 11 April 2019 at 17:00
Berlin,
Past event

Information / Description:

Everything is Changing will reveal the latest advances and newest roadmaps in this radically changing industry. The conference will include presentations from long-standing market experts as well as new entrants, to ensure important breakthroughs are shared from across the industry.

The event will focus on identifying rich pickings for chemicals and intermediate materials suppliers and others, whilst aiming to understand disruptive change from:

- Forthcoming energy independent vehicles (EIVs)
- Totally new energy storage and other components
- Merging of systems and structural electronics

Main conference sessions will cover energy storage, advanced batteries (including what comes after lithium-ion), fuel cell rollouts and supercapacitors.

In addition, over 200 exhibitors will be showcasing the full value chain and you will hear market and technology insights from users and suppliers.
