EU Sustainable Energy Week

Monday 17 June 2019 at 09:00 Friday 21 June 2019 at 18:00
Brussels,
Past event

Information / Description:

This year, the EU Sustainable Energy Week (EUSEW) is returning for its fourteenth edition. EUSEW is dedicated to renewables and efficient energy use in Europe and this year's theme is '*Shaping Europe's energy future*'.

If you have an initiative or innovation which will shape Europe's energy future, [apply](#) for a session to be held at the EUSEW Policy Conference until 28 January 2019. Registration will open in April 2019.

Last year's sessions ranged from renewable energy in transport to encouraging e-mobility uptake across the EU. The [guidelines](#) provide greater detail on the theme, eligibility, evaluation criteria and application process.

In addition to the Conference, the [EUSEW Awards](#) will take place, which recognise outstanding innovations in sustainable transport and renewables. The [Networking Village](#) will be hosted in the EC Charlemagne building from 18-20 June 2019 and local sustainable energy events, 'Energy Days', organised by local stakeholders and private organisations, will occur throughout the months of May and June. Calls for submissions for Energy Days will open later in January.

For more information on EUSEW, please visit the event [website](#).
