Past event

Information / Description:

The IEEE-Forum ISTS2020 was to be hosted in Delft but due to the uncertainty, it will be transformed into an online conference. Please visit the event website for the latest information.

IEEE Forum on Integrated and Sustainable Transportation System (FISTS) is a forum sponsored jointly by four IEEE Societies: the Aerospace and Electronic Systems Society, the Intelligent Transportation Systems Society, the Oceanic Engineering Society, and the Vehicular Technology Society. FISTS offers presentations, lively discussion, and visionary futures about sustainable transportation systems that create economic opportunity and improve access to basic human needs.

The Forum-ISTS will bring together major actors in all these areas from all over the world. It is the specific ambition of the conference committee to have high-level speakers expressing their views, and stimulate an intensive discussion with the audience on what we need to achieve by a sustainable transportation system and what measures have to be taken into account to reach these ambitious goals.

Forum-ISTS 2020 will focus on three key areas: Electrification, Sharification, Connected Automation.
