[Intermodes - Brussels Study Tour](#)

Thursday 25 October 2018 at 14:00 Friday 26 October 2018 at 17:00

Brussels Region,

Past event

Information / Description:

The study visit is organised in partnership with Bruxelles Mobilité, Brussels Capitale Region's Transport Organising Authority and STIB, the public transport operator.

The Brussels Region has set itself a goal of exemplariness in terms of mobility. It consists of reducing car traffic by 20% to improve air quality, travel efficiency and urban conviviality.

To this end, several measures have been decided to encourage alternative mobility.

The approval of the new Regional Mobility Plan, planned for 2018, will give the signal for the development of the new Municipal Mobility Plans. The latter will have to translate, at the local level, the regional policies on mobility. The MMP will take spatial planning into account.
