## **[MOBI-MIX Roundtable on Collaboration Models with the Private Sector](#)**

Tuesday 25 August 2020, 16:00 to 18:00

Past event

### **Information / Description:**

The [MOBI-MIX](#) project intends to facilitate the uptake of innovative transport solutions to fulfill their potential and have a positive impact in reducing carbon emissions. To achieve this, the project will develop and source state-of-the-art public-private collaboration models for more effective implementation of micromobility and MaaS solutions, ultimately leading to a more livable city.

POLIS is inviting transport stakeholders to participate in a direct dialogue about challenges and solutions regarding public-private collaboration. The roundtable will be held virtually and led by international experts following a list of discussion topics set in advance. This list will be published soon, but if you have suggestions about discussion topics, POLIS welcomes you to [reach out](#).

Register for the roundtable [here](#).

What can you expect from the expert discussion?

1. Examples of best practices
2. Direction on how challenges can be addressed by cities
3. Examples of failed practices

Why organise a high-level discussion roundtable?

The involvement of international experts allows public authorities to source and select globally the best ideas, state-of-the-art approaches and innovative examples that enables the public authorities to have a wide range of design options which goes beyond the usual options in their local network. This transforms cities into informed decision-makers, ultimately leading to an improved implementation of Smart Mobility.
