Shared Mobility Rocks

Tuesday 08 October 2019, 09:00 to 18:00

Brussels,

Past event

Information / Description:

International Shared Mobility Symposium

Free of charge

Shared mobility on main stage! Because where does shared mobility come into its own better than on stage? The international event SHARED MOBILITY ROCKS immerses the audience in a full program of keynotes, panel discussions and jam sessions, glued together seamlessly with solid rock songs.

October 8th is 100% shared mobility. Because shared mobility becomes the sound of the coming years, and of the future, and is ready to pound the doors of our mobility.

More than 25 (inter)national speakers give you good vibes and new insights on current topics about shared mobility: about urban design, smart cities, accessibility, impact, social inclusion, MaaS, rural areas, self-driving car and technology, ... Shared Mobility Rocks focuses on the story of regional and local authorities: no commercial talks but relevant inspiration for your work.

In addition to the English plenary sessions, there are jam sessions and labs in Dutch and French.
