[Smart Cities and Mobility Forum: Digital Event](#)

Thursday 01 October 2020 at 09:00

Past event

Information / Description:

The annual Smart Cities and Mobility Forum is already becoming the leading platform for new urban technology and the transformation of mobility and living. Now in its third year, the event is a meeting place for the policy, business and civic society sectors, where participants can keep up-to-date with, and explore, new trends, business models and policies in urban development and mobility technology.

Key topics on the 2020 agenda include, although are not limited to:

- Urban planning for future cities: best practices and lessons learned
- Intelligent mobility: electric and autonomous cars, intermodality, mobility as a service
- Disruptive technology impact on cities: 5G mobile network, Internet of Things (IoT), new mobility, smart utilities
- Climate change, air quality as rising urban challenges
- The leading role of smart cities in the clean energy and circular economy agendas
- Data management and cybersecurity for smart cities

For further information, please visit the [event website](#).

The deadline for registration is 28 September 2020, which can be [accessed here](#).
