## TUCTE 18: Towards User-centric Transport in Europe

Tuesday 13 November 2018, 09:30 to 16:30  
Brussels,  
Past event

### Information / Description:

#### Enabling seamless and sustainable mobility for all

Increasingly, social and environmental trends are posing new challenges to the transport sector in Europe. This paradigm shift in mobility and transport calls for disruptive technologies and multimodal solutions.

Mobility4EU established a Vision and Action plan for the future of transport in Europe in 2030 based on the identification and assessment of societal challenges that will influence future transport demand.

The Mobility4EU interactive [Stakeholder Forum](#) has been launched to put user-centric approaches, multimodal cooperation and projects joining transport of passenger and freight in action.

TUCTE 18 will show the results of the Mobility4EU project with a focus on the Vision and Action Plan for user-centric and cross-modal transport in Europe in 2030. The discussions and topics that the European Transport and Mobility Forum will continue to work on beyond the project will be introduced.

Interactive formats will provide final feedback for the action plan and invite all participants to engage in exploring and discussing pathways towards user-centric transport offers and the building of an integrated transport system.

Registration is free, but places are limited - so [sign up now!](#)
