UVAR Box - save the date for the first workshop

Tuesday 24 November 2020, 10:00 to 12:00

Past event

Information / Description:

SAVE THE DATE for the first Workshop of the recently awarded EU project on UVAR digitisation, UVAR Box.

UVAR Box was awarded in the framework of a [tender for DG MOVE](#). It is a 2-year project started in August 2020 and coordinated by Armis, in a consortium alongside AlbrechtConsult, AustriaTech, MAPtm, MEMEX, POLIS Network, PRISMA Solutions and TRT, with Harrod Booth Consulting, Sadler Consultants and U-Trex as subcontractors.

The project aims to harmonise and enable the digital accessibility of information on Urban Vehicle Access Regulations (UVARs). You can find more information [HERE](#).

In order to develop a machine-readable format, a structured overview of UVAR data and processes in the EU is required.

Therefore, the purpose of this workshop will be to:

- inform stakeholders on the UVAR Box approach
- present and discuss the UVARBOX fact-finding approach (survey, interviews, desktop)
- receive first reactions and needs from external stakeholders.

The workshop will take place online on 24 November 2020 from 10:00-12:00 CET.

For further information, please see the [press release on the CLARS website](#).

To register for the event, please see the [event registration page](#).
