On-demand webinar on data challenges in transport policy making

This webinar has been shared by PoliVisu and is available to view on-demand to give an overview of various data challenges experienced by cities, with a particular focus on three PoliVisu pilots: Ghent, Mechelen and Issy-les-Moulineaux.

During discussions, representatives of local and regional administrations speak about the issues they faced and outline how they were able to address them using the PoliVisu solution. The PoliVisu project has received funding from the European Union’s Horizon 2020 research and innovation programme to provide a place for sharing and gathering expertise in data-supported policymaking.
