The City of Hradec Kralove

Jana Svobodova
The City of Hradec Kralove

General Information

- 92 900 inhabitants
- 105 km²
- Regional capital
- University city
- An important crossroad of the road and rail transport
- Radial circuit system of the main roads, supplemented by a coordinated system of traffic-light controlled intersections
Transport Policy

Main problems

• Low capacity of parking places
• Insufficiently interconnected network of cycle paths
• Inappropriate connection of the city to the highway

• The city can not solve traffic only from its own resources
• Lack of important documents concerning transport
Transport Policy

Objectives

• Traffic control by the intelligent transport system
• Integrated transport system of the two neighbouring cities (Hradec Kralove and Pardubice)
• Safe network of cycle paths and walking routes
• Affordable, safe and comfortable public transport
Current status of SUMP

- Currently, the city has finished the SUMF (Sustainable Urban Mobility Framework), which is focused on the public transportation.
- Next step will be preparation of the multi-modal model of the transportation in the city as a next step in SUMP preparation.
- ITI (Integrated Territorial Investments) strategy of the Hradec Kralove – Pardubice agglomeration
  - Working group - “Attractive environmentally-friendly transportation”
Thank you for your attention!
