

Partnership on Urban Mobility: draft list of actions

Piotr Rapacz, DG MOVE B4, 6/03/2018

Focus areas and activities:

To frame its work, the Partnership has identified four thematic areas:

1. Active modes of transport;
2. Innovative solutions and smart mobility;
3. Public transport for cities; and
4. Governance and planning.

For each of the above-mentioned themes, the Partnership identified bottlenecks and potentials.

Partnership developed the **nine actions which are presented in the Public Feedback and are open to stakeholder feedback**. The actions aim at addressing real needs:

- issues that have real and visible impact
- concern a larger number of Member States and cities;
- actions should be 'innovative' without 'recycling' elements which have already been done or would be done anyway.
