CIVITAS PORTIS Mobility Behaviour Change Webinar Series
WEBINAR 3: The Physical Dimension 3rd of September 2020 | 11:00 – 12:00 CEST

The CIVITAS PORTIS webinar series is sharing the experience and lessons learnt of the five project cities, Aberdeen, Antwerp, Constanta, Klaipeda and Trieste, as they seek to foster a shift to sustainable mobility through a combination of behavioural change campaigns, new digital services and physical infrastructure improvements.

In the final instalment of this webinar series, we will hear how the cities of Constanta and Klaipeda are delivering infrastructure that help make active and public transport modes the obvious and natural choice. With CIVITAS PORTIS as the catalyst, Constanta has been planning the transformation of major boulevards in the central part of the city, involving reprioritisation and enhancement of city street space. Meanwhile in Klaipeda, where cycling is already a popular recreational activity, the city authority has been driving forward the provision of bike-sharing and cycle parking and storage, contributing to the fostering of an everyday cycling culture.

In case you missed them, recordings of webinars 1 and 2 are available at https://civitas.eu/portis

Please save the date and register for the webinar here.

Best regards,
the CIVITAS PORTIS team
