Smart Mobility in Smart Cities: WALK.RIDE.DRIVE.FLY
01 October 2020, Urban Mobility Days 2020
Urban traffic goes to the third dimension!

‘Urban’ implies more than increased levels of safety and security

Urban air traffic sets a new ‘status quo’

- Airspace digitalisation
- New infrastructure (aviation + mobility)
- New interfaces (aviation + mobility)
- New business / services
- New mindset in policy & regulatory approaches (e.g. ‘safe pre-legal innovation’ & role of city testbeds)
