BENELUX - A LIVING LAB FOR THE EU
• Intergovernmental cooperation between Belgium, the Netherlands and Luxembourg

• Taking away barriers that prevent the well-functioning of the Benelux internal market

• Cooperation in the field of (urban) mobility: Mobility as a Service, Bike, Low Emission Zones
Urban Vehicle Access Regulations (LEZ)

- 16 Benelux cities with (plans to install) a LEZ. Also many other EU cities with LEZ
- UVARs, such as LEZ, strongly contribute to achieving air quality and climate Targets

- Lack of (EU) framework to control & enforce foreign vehicles leading to practical and administrative burdens for citizens, transport companies and authorities
- First step taken by Benelux: Agreement to exchange technical data at Benelux-level for control purposes
