Data-driven decision making tools for small and medium-sized cities

Giovanni Maccani, Ideas For Change

giovannimaccani@ideasforchange.com
WeCount is a H2020 citizen science project whereby citizens measure traffic from their windows and participate in the co-design of new public policies proposals informed by the data collected and analysed.

This project has received funding from the European Union’s Horizon 2020 research and innovation programme under grant agreement No. 872743.
What is it about?
Thanks!
