- 30M passengers globally
- 1M drivers globally, 300,000 in the EU

Unbuilding the private car

ON-DEMAND

PRIVATE CARS

PUBLIC TRANSPORT

Micromobility

- Scooters deployed in 45 cities
 - 3rd largest scooter operator in Europe
- Bolt's custom designed and engineered electric scooter is:
 - The most easy-to-repair scooter on the market right now
 - 55% lighter than other scooters on the market
 - Made of 90% aluminium and other recyclable materials
 - Has a lifespan of up to 5 years
- Most affordable scooters on the markets we operate in

Bolt Green Plan

- A long-term commitment to reduce the ecological footprint of Bolt
- All Bolt rides in Europe are 100% carbon-neutral
- Climate positive e-scooter operations by end of 2020
- We are bringing more electric vehicles, scooters and e-bikes to the Bolt platform & cities

Integrating shared mobility services in urban mobility ecosystems

- Bolt supports cities in solving local transport problems
- Bolt is compliant with local regulations and works closely with local authorities
- Bolt shares data with the cities in which it operates
- Bolt Green Plan to reduce environmental footprint
- Partnerships with other local private mobility operators (mobility hubs...) and local associations
